Installation Vedio Link

<https://www.youtube.com/watch?v=TCCp7N0kwdI>

Before starting, we recommend writing to us to confirm your deadbolt

1. Take down the original lock

Loosen the screws on the inside part of your original lock

2. Install the baseplate of lock

Put the faceplate inside the lock and go head tighten the screws back

3. Loosen the screws

Go ahead and loosen the two screws on the bottom of the key box. Then pull out the fixing plate at the bottom and take out parts inside the key box

4. Choose adapter

Please choose the right adapter depending on the shape of your original lock lever

5. Put the adapter into the key box

Put the adapter through the fixing plate and into the key box. Go ahead and tighten the screws back

6. Install key box

Insert the key box into the lock, make sure the deadbolt is unlocked.

7. Make sure the smart lock is on

Push the power button with the eject pin or paper clip. When hearing the sound "beep", it means the smart lock is on.

8. Install the smart lock

Install the smart lock on the faceplate,,tighten all your screws back. And now the installation is finished.

Use the oitsme app to complete setup

1.Download oitsme APP

Scan the QR code on the package to download the "oitsme" app, or search 'oitsme' directly in the apple store or google play to download.

2.Add a device nearby

Open the oitsme APP and click to add a device.

3.Select SL-1

4.Start to set

5. Select door lock type

6.Start learning

Note:make sure the deadbolt is unlocked

7. Start testing

8. Name the device

9.Name your key

10.Set password

TOP 3 QUESTIONS

A.How to use the button

Short press button to unlock and long press button to unlock.(After pressing the button for three seconds,it will ring twice,and then automatically lock the door after seven seconds)

B.What if I can't search for a device or connect?

1. Check if there are other mobile phones being connected. After disconnecting, try searching again. If not, please go to step 2.
2. Restarting Bluetooth, then go back to the oitsme app and try to search for the device. If not found, please go to step 3.
3. Activating the device's shake compatibility mode (Strike hard for 3 seconds, the device needs to detect a vibration every second, wait 3 seconds after the tap is completed). After the device beep sounds, return to the oitsme app to search for the device. Nothing found, please go to step 4.
4. Using the tool to poke the reset button on the back of the fuselage directly.

C.What if i lost my phone?

While your phone is lost, please log in to the device as follows, and enter the "key list" to delete the lost key, so that no one can get the door to your phone without resetting the device, and then you can continue using your new phone with a key.

- 1.Click the "+" in the upper right corner of the application and select "Add Device".
- 2.After the application connects to the device, click "Background Management" and enter the management password to enter the APP background;
- 3.Enter the APP background, scroll through the list for the keys you want to delete, click "Delete".
